38 The author list for journal publications is generated from the Membership Database
39 shortly after 'approval to go to paper' has been given. It will be sent to you by email
40 shortly after a paper number has been assigned. The author list should be included already
41 at first circulation, to allow new members of the collaboration to verify that they have been
42 included correctly. Occasionally a misspelled name is corrected, or associated institutions
43 become full members. Therefore an updated author list will be sent to you after the final
44 EB review of the paper. In case line numbering doesn't work well after including the
45 authorlist, try moving the `\bigskip` after the last author to a separate line.

46 The authorship for Conference Reports should be "The LHCb collaboration", with
47 a footnote giving the name(s) of the contact author(s), but without the full list of
48 collaboration names.
